

Fund Manager / Investment Analyst Job Description

Elevate investment world through your idea and AI robot friends.

Deepscope provides analysis of the entire stock market to deliver the best quality stocks that beat the market which helps investors/brokers/funds improving their investment performance. Our AI / data mining deep analysis platform produced a good level of average yearly capital gain returns proven by official fund management companies. Deepscope now serves 60,000+ users and also operates AI/Algorithm public/private funds without human efforts.

Now is the time where the financial analysis collides with the technologies such as AI / data mining / machine learning. Let's empower the investors/brokers/funds with the advance intelligent tools and see the personal investment changing globally.

We're looking for an open-minded, creative and result-driven fund manager / investment analyst passionate about helping and educating people to invest and plan their wealth more effectively.
